Dated the 2nd day of ~~Feby~~ March 1920.

Sir,

Enclosed herewith we have the honour to forward on behalf of John Wells, an application under the Inventions and Designs Regulation 1894, for leave to file a specification in respect of an invention for Improvements in Gas cleaning apparatus.

The documents sent comprise :- a Power of Attorney in our favour, and the Application with a description of the invention and Drawings.

A Patent for this invention in British India has been applied for, particulars of which are set out in the Application.

The fee of Rs 10/- payable on the application and one rupee for the stamp duty on the Power of Attorney, are included in the Money Order for Rs 77/- being sent by same mail.

We have the honour to be,

Sir,

Your most obedient servants,

H. V. Williams & Co

ENCLOSURES

Case 36

APPLICATION

To.

The Dewan of Mysore.

THE APPLICATION of JOHN WELLS of 36 Sharia Falaki, in the City of Cairo, Egypt, Consulting Engineer, for leave to file a specification under Part 1 of the Inventions and Designs Regulation, 1894.

The applicant is in possession of an invention for "Improvements in Gas Cleaning Apparatus", he is the inventor thereof; and to the best of his information and belief, the invention is new within the meaning of Part 1 of the Inventions and Designs Regulation, 1894; and no circumstances exists which if the applicant be authorized to file a Specification and files it in accordance with that Part will disentitle him to an Exclusive Privilege thereunder in respect of the Invention.

An application for a Patent was filed in British India, on 4th November 1919, No.4975; See Gazette of India, Part II, Page 1908, dated 15th November 1919. And accepted on 8th December 1919; see Gazette of India, Part II, Page 2116, dated 13th December 1919.

The following is a description of the invention:-

This invention relates to improvements in gas cleaning apparatus and comprises one or more centrifugal tar extractors constructed in such a manner that the number of tar extractor units can be readily increased or reduced. In combination with the tar extractor units there may be provided a gas booster or delivery fan.

In the accompanying drawing:-

Fig. 1. is a longitudinal central section, and Fig. 2. an end elevation of a gas cleaning apparatus constructed according to this invention.

As shown in this drawing.

A is a cast iron standard, with four bolt bosses E. The face of A at C is circular in form with an annular groove or depression D. In the centre of the standard A is a long bearing E attached to the standard A by bolts F and F, being made detachable so as to be easily replaced. Through the bearing E there runs a shaft G, to which are attached the booster fan H and the tar extraction paddles I. On the face of the standard A is a ring piece J provided with a gas outlet K, the edge of the ring piece J fitting into the annular groove D. Within the ring piece J there is mounted

on the shaft G a disc with a series of paddles H, acting as a fan, blower or booster. Following the ring piece J is a division plate L with a hole through the centre. Following the division plate L is a tar extractor ring M fitted with a tar exhaust or outlet M, extending into a water seal. Within the tar extractor ring N is a disc fitted to the shaft G and carrying a series of paddles or vanes I. The ring M is followed by a division disc L and then by a water service ring O for provision of water to the centre of the extractor ring M.

The water service ring O is followed by a division disc L and then by another tar extractor ring. Two such tar extractor units are shown but one or any convenient number may be provided.

After the final tar extractor ring there is fitted an end plate P forming an inlet for the gas. The end plate P is further fitted with four bolt bosses corresponding to the bosses B on the base plate A. When all parts are in position bolts are passed through the bosses and the various rings and divisions-discs are thus securely fastened in position. The various discs and their paddles mounted on the shaft G are held on the proper positions by suitable distance pieces Q

and the whole secured in position by means of the nuts and screw provided on the end of the shaft G.

Having described the construction of tar extractor I will now described the working thereof.

The end plate P is coupled, by means of pipes to the gas producer and the gas enters thereby, where it meets with the water dripping from the pipe O after which it is immediately expelled to the periphery of the tar extractor ring by the paddles I revolving at great speed. The gas then passes back to the centre of the extractor against the centrifugal force of the paddles on the other side of the paddle disc. The gas then passes through the hole in the centre of the division plate at which point water is also allowed to drip, and thence into the second stage of the tar extractor, finally passing into the booster ring J, from which the clean gas passes to the engine, or for other use.

The gas is ejected from the booster ring under pressure which varies according to the size of the discs and paddles and their velocity.

Having now particularly described and ascertained the nature of my said invention, and in what manner the same is to be performed, I declare that what I claim is:-

1. A gas cleaning apparatus comprising one or more tar extractor units constructed of loose rings and division discs held together by bolts and enclosing rotary paddles.

2. The combination with the apparatus claimed in claim 1, of means for supplying water to any or each of the extractor units as and for the purpose described.

3. The combination with the apparatus claimed in claim 1, of a fan for raising the pressure of the gas after it has been treated in the said extractor units as and for the purpose described.

4. Improved gas cleaning apparatus constructed and operating substantially as described, and illustrated in the accompanying drawing.

The applicant therefore, applies for leave to file a Specification of the invention pursuant to Part I of the Mysore Inventions and Designs Regulation, 1894.

Dated this 20th day of November 1919.

John Wells

I, JOHN WELLS, the applicant above named do declare that what is stated in this Application is true to my knowledge, except as to matters stated on information and belief, and as to those matters I believe them to be true.

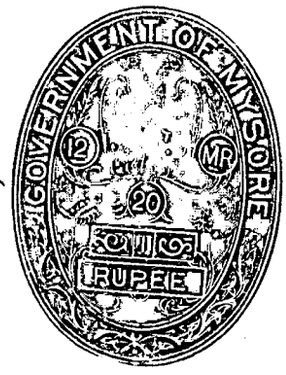
MYSORE

POWER OF ATTORNEY



IN THE MATTER of the Inventions and Designs Regulation, XI of 1894, of the Government of Mysore;

and

IN THE MATTER of JOHN WELLS, of 36 Sharia Falaki, in the City of Cairo, Egypt, Consulting Engineer, an Inventor.

I, the above named JOHN WELLS, do hereby retain constitute and appoint Messrs. H. V. Williams & Co., Patent Agents and Engineers, of 8 Esplanade East, Calcutta, British India, as my Agents and Attorneys to apply for and obtain from the Government of Mysore an Exclusive Privilege for "Improvements in Gas Cleaning Apparatus" and to maintain the same in force; and I authorize them to sign my name to such papers and writings and do such acts regarding the same, including substitution and revocation, as may be necessary or expedient. And lastly, I request that all notices, requisitions and communications now or hereafter relating to the same may be sent to such Agents at the above address, and that they be recognised as my authorized Agents in all proceedings incident thereto.

Dated this 20th day of November 1919

Signed, sealed and delivered by the above named JOHN WELLS, at London, in the presence of:-

GENERAL DEPARTMENT.

Register No. 25 of 1919-20

Bangalore, the 6/4/1920.

WHEREAS an application, dated the 2nd March 1920 and received on the 5th March 1920, has been submitted under Section 5 of the Mysore Inventions and Designs Regulation, 1894, by Messrs H. V. Williams & Co., Calcutta on behalf of Mr. John Wells of 36 Sharia Zelaki, Cairo, Egypt, by occupation, Consulting Engineer, (hereinafter referred to as "the applicant") for leave to file a specification of an invention for "Improvements in gas cleaning apparatus (Case III)"

And whereas the applicant has duly complied with all the requirements of Section 5 of the said Regulation;

The Government of Mysore are pleased, under Section 6 of the said Regulation, to authorize the applicant to file a specification of the said invention in accordance with the provisions of the said Regulation.

ORDERED, that the applicant be, and he is hereby, informed accordingly.

By Order of the Government of Mysore,

M.A. 26.3.20. Rec'd 30.3.20

dcs 27/3/20.

for Chief Secretary to the Govt. of Mysore,
~~General Department.~~

dcs 29/3/20

Certified that the fees prescribed in the fourth schedule to the Mysore Inventions and Designs Regulation, 1894, in respect of the application for leave to file the said specification and of the filing thereof have been paid by the applicant, and that the specification hereinbefore described has been duly filed in accordance with the provisions of Section 8 of the said Regulation on this the Twelfth day of July 1920.

dcs

for Chief Secretary to the Govt. of Mysore,
~~General Department.~~

(Section 8 of the Inventions and Designs Regulation, 1894.)

8. (1) If within six months from the date of an order under Section 6, Sub-Section (1), or within such further time, not exceeding three months, as the Government of Mysore, in its discretion, may, on cause shown to its satisfaction and on payment of the fee prescribed in that behalf in the fourth schedule, see fit to allow, the applicant causes a specification of his invention to be filed in manner by this Part required, and the fee prescribed in the fourth schedule in respect of the filing of the specification to be paid, the applicant shall, subject to the other provisions of this Part, be entitled to the exclusive privilege of making, selling and using the invention in the Territories of Mysore, and of authorizing others so to do, for a term of fourteen years from the date of the filing of the specification.

(2) But an exclusive privilege in respect of an invention of a new manufacture shall, notwithstanding anything in Sub-Section (1), cease, if the inventor fails to pay, within the time limited in that behalf by the fourth schedule, any fee prescribed in that schedule in respect of the continuance of the privilege.

(3) If, nevertheless, in any case, by accident, mistake, or inadvertence, an inventor fails to pay any such fee within the time so limited, he may apply to the Government of Mysore for an enlargement of the time for making the payment.

(4) Thereupon the Government of Mysore may enlarge the time accordingly, on payment of the fee prescribed in that behalf in the fourth schedule, and subject to the following conditions, namely :

(*a*) the time for making a payment shall not in any case be enlarged for more than three months ; and

(*b*) if any suit is instituted in respect of an infringement of the exclusive privilege committed after a failure to make a payment within the time limited for the making thereof and before the enlargement of that time, the Court disposing of the suit may, if it thinks fit, refuse to award or give any damages in respect of the infringement.
